

Lance tube Datasheet

Physical properties :

6 mm	outer diameter
4 mm	inner diameter
1 mm	thickness
3.30 cm	length of the pipe
درز مخفی ERW	type
ISIRI-3574	Production standard
simple carbon	Materials /iron metal
OK	Acid washed & Degreased
OK	deburring
OK	Standard packaging

Description :

- Lance tube is a tube made of steel tube
- Its most important application is to transfer gas and various molten powders
- Many gases, even argon, oxygen, and nitrogen, can be transferred from the lens tube to the intended destination, or injected
- It is also used for cleaning and washing large tanks, production bottles, nozzles and slide gate systems
- The steel sheet used to make the lance tube contains compounds such as 10% carbon, 3% sulfur and 1.4% phosphorus
